Work Experience

Software Engineer   SpotDraft (Draftspotting Technologies Pvt Ltd), Bengaluru
Jan 2023 – Present
- Delivered features end-to-end across Angular/React frontends and Express/Node.js backends, collaborating with PMs, designers, and QA.
- Built reusable UI components (color picker, image cropper modal, advanced date filters, popovers) powering personalization and extensibility across the platform.
- Led major revamps including the Summary Page redesign (Contract Status, Approvals, Notes, Counterparty Details) and the Summary of Changes (AI Feature) across web + Word/OnlyOffice plugins, achieving 92% adoption.
- Implemented backend validation APIs (dropdowns, signature blocks) and extended Elasticsearch logic, reducing QA tickets and enabling advanced reporting.
- Refactored Express services and optimized Node.js servers with worker threads, cutting CPU-intensive failures by 80%.
- Automated onboarding (bash + pyenv + poetry), reducing environment setup time from 2 days $\rightarrow$ 15 minutes.
- Partnered with PMs, designers, and backend engineers to deliver features with polish while mentoring new hires and reviewing technical specifications.

Full-Stack Software Engineer   Interbiz Consulting Pvt Ltd, Raipur
Aug 2020 – Dec 2022
- Designed and developed multi-level data visualization systems (nested tables + graphs) for 10k+ row datasets across Angular apps.
- Built reusable UI table components, improving maintainability and UI performance.
- Developed low-latency IoT polling system using Azure Trigger & Durable Functions.
- Managed a 4-person team, planned sprints, and mentored 12+ junior frontend developers.

Education

B.Tech, Information Technology   Govt. Engineering College, Bilaspur
2016 – 2020 — CGPA: 7.52

Higher Secondary (PCM, CBSE)   JNV Baikunthpur
2014 – 2016 — 86%

Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML, CSS, Python, basic C#
- **Frameworks:** Angular, React, Angular Material, RxJS, Cypress, Node.js, Express
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Testing:** Jest, Cypress (unit, integration, e2e)
- **Tools:** Git, Nx Console, Jira, Docker, WOPI
- **Strengths:** End-to-end feature ownership, scalable UI architecture, API integration, developer tooling
- **AI/Dev Productivity:** Prompt engineering, AI-assisted testing, AI-driven code reviews
